Water & Wastewater Practicum Placements Needed

The COVID-19 pandemic has affected all of us in many ways. Have you adjusted shift operations, and are planning to hire staff to support your organization during this time? Alternatively, are you looking to fill future vacancies within your organization?

NAIT's Water and Wastewater (WWW) Technician students are required to obtain a minimum of **600 hours** of work experience in one or more of the following disciplines: water treatment, water distribution, wastewater collection and wastewater treatment in order to complete their certificate.

There are a number of students still seeking employment to complete the industry practicum portion of the program. With your support, we hope to provide our students with a variety of employment opportunities as soon as possible.

Additional funding opportunities released by the Federal Government on April 8, 2020 to offset costs to employers is below:

Student Work Placement Program (Federal):
