

Inspired by our **Purpose** — "We help people enjoy a better life and communities thrive." — Corix is a community-focused provider of essential utility services that ensure the long-term viability of the communities and customers we serve. We differentiate ourselves from traditional utility service providers through our broad expertise in water, wastewater, and energy utilities, and our ability to leverage that expertise to structure tailored solutions for our customers.

We are looking for a **Utility Operator** to join our team in Lac La Biche, Alberta.

### **About the opportunity**

The Utility Operator operates and maintains a BNR wastewater facility, including septage receiving, sampling, analysis and maintenance of equipment to ensure water treatment, distribution, and/or wastewater treatment is performed as per regulatory, environmental and safety standards.

Please note that Operators at this facility are on a two week on/two week off rotation. During your time off you may be required to return to the site on short notice. Operators are also required to tow a trailer to a nearby landfill as part of this role so you must have a valid driver's license.

### Responsibilities:

- Start and stop pumps, engines, and generators to control and adjust flow and treatment processes
- Perform daily, weekly, monthly, and quarterly sampling. Monitor, document and be responsible for all aspects of a wastewater facility. To ensure continuous compliance with regulatory requirements.
- Operate, inspect and service equipment for all types of water and wastewater processes. Including hydraulics, pumps, valves and other related equipment.
- Performs related security, safety and administrative procedures involving chemical hazards, personal protective equipment, general health and safety procedures, and emergency preparedness
- Maintains emergency preparedness binders and field operating manuals
- Undertakes routine repairs to water distribution and wastewater treatment and collection systems
- Maintains shift logs, recoding meter and gauge readings

### **Who you are**

You are a certified operator – Alberta Level II - or you are close to obtaining your Level II certification. You must have a minimum Class 5 Alberta driver's license and a clean driving record.

The successful candidate also has:

- Mechanical aptitude and ability to use power tools
- Experience with HVAC, SCADA and/or HMI and TDG Lab experience
- Excellent communication (verbal and written) skills
- Proven troubleshooting and problem-solving skills;
- Ability to lift 20 kgs occasionally
- Knowledge of and ability to use Microsoft Office applications including word processing, spreadsheets and databases;
- Knowledge and understanding of WCB Alberta practices/protocols;
- Ability to learn and perform tasks with little direction, or supervision;
- Ability to outside work in inclement weather.
