**You need it? We've got it.
If we don't, we'll get it.**

Why choose us?

Whether you need a micro ROV to conduct HD video inspections or a fully certified commercial dive crew to construct your underwater projects, **Aquatech Diving & Marine Services Ltd has got you covered!**

Benefits from choosing Aquatech Diving & Marine Services Ltd include:

-  **Very quick set up and tear down**
-  **Inexpensive**
-  **Extremely safe**
-  **High quality video**

Aquatech Diving & Marine Services Ltd, providing safe, sustainable marine and diving services since 1993.

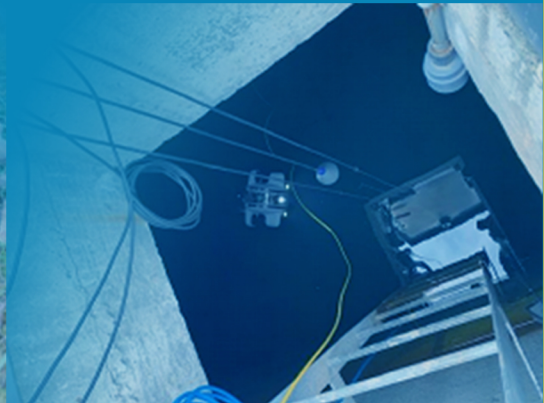

ROV Services

Our ROV division uses Canadian-made ROV's. They are compact and battery operated. No need for power supplies. The DTG2 is a "swimmer". Its small size enables it to fit into the tightest of hatches or the tallest of water towers.

The DT340S is a pipe crawler. With wheel sizes from 8"-12" and a tether length of 1200' it can tackle tough inspections. It's 4-wheel drive skid steer capabilities allow it to drive over sediment that may be in the pipe.

DT340S pipe crawler

DTG2 micro ROV

No need to shut down facilities

Very quick set up and tear down

High quality video and LED lights

Battery operated units allow 8-hour run times

Very safe

Contaminated Diving

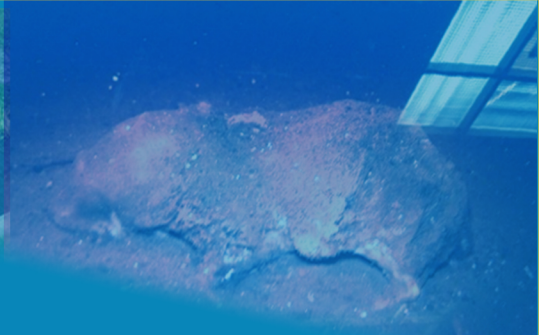

Aquatech Diving & Marine Services Ltd is ready to get dirty for you.

Whether it's in sewage containment lagoons or pulp mill settling ponds, we've got you covered. Our contaminated diving equipment is only used for contaminated diving. It is thoroughly disinfected after each dive. Safety for our divers is paramount, so a minimum crew of 6 is committed to keeping the diver and the site safe.

- 🧐 Designated contaminated equipment only
- 🧐 Best available dive gear
- 🧐 Minimum 6-person crew
- 🧐 Safety zones and signage
